## Supplying Borates: Critical minerals for industries

Rio Tinto's proposed underground Jadar mining and processing project in Serbia will boost the supply of in-demand borates to crucial technology and agriculture sectors.

### BORATES

are vital to the production of smart phones, solar panels and other renewable energy technologies such as wind turbines.

### THE JADAR PROJECT

will become a significant supplier of minerals essential for agriculture.

### A WORLD LEADER

in borates technology, research, and development, Rio Tinto currently supplies approximately 30% of global demand for refined borates.

### RIO TINTO

operates one of the world's richest borate deposits in California, utilising 135 years of experience in mining and processing borates.

## BORATES

An essential part of industry — and everyday life

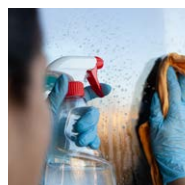

Agriculture

Batteries and Capacitors

Ceramics, Enamels, and Glazes

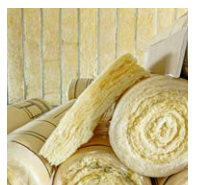

Cleaners and Detergents

Fire Protection

Glass and Textile Fiberglass
